

The Future is Paperless Adoptions

PetPoint's Paperless Adoptions features will automatically send relevant reports, documents, and signed contracts to your adopter's email inbox at the time of adoption, such as:

- Adoption Contract Medical Reports
- Adopter information for Microchip Registration and Complementary 30-Day Trial of Pet Insurance
- Other documents your admin has selected in the setup screen (Admin Options > Paperless Adoption)

To learn how to enable these functions, reach out to your Client Services representative or email PHISoftwareSolutions@Pethealthinc.com.

The Future is Paperless Adoptions

e-SIGNATURE

Electronic Signature Capture allows PetPoint organizations to capture a person's signature on various contracts and documents throughout PetPoint. Then PetPoint allows you to email a copy of the signed contract to the person and store a copy of the signed contract on the record.

FILE STORAGE

Whether you're onsite or working remotely, File Storage allows you to upload and store documents, files, and images to your PetPoint Database so that you can access them when you need them.

To learn how to enable these functions, reach out to your Client Services representative or email PHISoftwareSolutions@Pethealthinc.com.
